Proposal Template Wallenberg Advanced Scientific Forum 2024

Research Area
Workshops are limited to topics that include the WASP research areas. Interdisciplinary research and research with industrial relevance are encouraged.

Topics
Describe the topics to be discussed during the workshop.

Organizing Committee
Describe the organizing committee and how the members of the committee will contribute to a successful workshop.

Outcomes
Please state the expected outcomes.

A written report summarizing the discussions from the workshop will be requested by WASP within two months after the end of the workshop. The report should cover description of the area, conducted activities, scientific discussions, and outcomes. We expect the report to be approximately five pages.

Workshop Structure
Provide information about the overall program with respect to plenary presentations, discussions, breakout sessions, or other interactive elements. Describe how the different sessions will be moderated. Please describe how the different slots are envisioned and what kind of output that will come from one to the other session (day to day). Emphasis should be on interactions, discussions, working together and exchange of ideas where all participants should have equal possibilities to contribute to the discussions. Conventional conference like events and conference presentations are not acceptable.

Related Projects
Describe how the proposed workshop is linked to ongoing WASP projects.

List of Participants
Include a tentative invitation list of 40- 45 participants according to the below criteria:
- The organizing committee should be included in the list of participants.
- Ensure a good balance between junior (at least 5 PhD students and 5 postdocs expected) and senior researchers.
- Ensure international participants (at least 20 international leading researchers) and institutional balance.
- From the national perspective aim at geographical distribution and that researchers active in WASP are invited.
- Include experts that cover different aspects of the workshop topic.
- Include participants from industry and public sector if relevant.
- Gender balance aiming at 50/50 distribution among the participants.

Please include the below details for each participant:
- Name and affiliation
- Email address
- Research focus
- Link to personal webpage (not mandatory)

CVs of the Organizing Committee

Please include a curriculum vitae for each of the members of the organizing committee, describing their connection to the workshop topic and scientific achievements.

- A maximum of five publications relevant to the workshop should be included.
- A link to google scholar and/or personal webpage if applicable.
- Each CV should be maximum 2 pages.
